

MEDICAL DEVICES CROSSWORD

WORD BANK

Anesthesia ventilator
Apnea monitor
Aspirator
Electrocardiogram
Electroencephalogram
Electronic Thermometer
Endoscopes
External pacemaker
Fetal Monitor
Heart Lung Machine
Incubator
Infusion pump
Phonocardiographs
Phototherapy
Pulse oximeter
Sphygmomanometer
Surgical Microscope
Treadmill
Ultrasound sensor

Across

4. An instrument that uses thermoelectric current to measure temperature
7. An exercise machine used for running or walking while staying in one place
8. This regulates respiration and heart rate
9. An apparatus with a chamber used to provide controlled environmental conditions especially for the cultivation of microorganisms or the care and protection of premature or sick babies
13. An instrument for removing body fluids by suction
14. The exposure of bare skin to fluorescent light to treat jaundice
15. A device with a light attached that is used to look inside a body cavity or organ
16. A photoelectric instrument that detects the amount of oxygen in a patient's blood using infrared light and a photo sensor
17. An instrument for measuring blood pressure in an artery

Down

1. A device which tracks the baby's heartbeat in the uterus, including during labor
2. A test to detect problems in the electrical activity of the brain
3. A device used to visualize fine structures within the area of a surgical procedure
5. This displays important information about the heart, including the occurrence of a heart attack or lack of oxygen, whether conduction of the heartbeat is disturbed, or its rate or rhythm altered
6. A machine used in operating rooms to provide blood flow and respiration for the patient while the heart is stopped
8. This provides an accurate and continuous supply of medical gases mixed with an accurate concentration of anesthetic vapor delivered to the patient at a safe pressure and flow
9. A device that releases a measured amount of a substance in a specific period of time
10. A medical device whose primary purpose is to maintain an adequate heart rate using electrical impulses to regulate the beating of the heart
11. Devices consisting of microphones and recording equipment used to monitor and record heart sounds and murmurs
12. A device that creates images allowing various organs in the body to be examined using high-frequency sound waves
